SUMMARY

Results-driven Data Analyst with hands-on project experience in SQL-based data extraction, data cleaning and transformation, and analytics. Pursuing an MSc in Computer Science at the University of Greenwich, with practical experience building end-to-end data pipelines and machine learning models using Python, SQL and Tableau/Power BI. Adept at turning complex data into clear insights for technical and non-technical stakeholders.

EDUCATION

MSc in Computer Science

University of Greenwich, London, UK

Jan 2025 - Feb 2026

Bachelor of Technology in Computer Science

New Horizon College of Engineering, Bengaluru, India

2020 - 2024

SKILLS

Programming & Analysis: Python (Pandas, NumPy), SQL/MySQL, statistics, data cleaning & transformation, exploratory data analysis

BI Tools: Tableau, Power BI, Excel (VLOOKUP/XLOOKUP, Pivot Tables)

Machine Learning: Random Forest, XGBoost, LSTM, TensorFlow, Keras

Other: HTML, CSS, JavaScript

ACADEMIC PROJECTS

AI-Powered Algorithmic Trading Strategy Development

May 2025 - Dec 2025

- Built predictive models (Random Forest, XGBoost, LSTM) for algorithmic trading using Python, SQL and MySQL for data manipulation and querying.
- Implemented deep learning pipelines with TensorFlow and Keras; ran backtesting, walk-forward optimization and market regime analysis.
- Measured model performance via Sharpe Ratio, Max Drawdown and Win Rate; built a responsive data-driven web page with HTML/CSS/JavaScript.

Virtual Fitness Trainer Using Artificial Intelligence

Oct 2023 - May 2024

- Applied machine learning to analyse user movement for real-time posture correction and customised workout generation.
- Synchronised and analysed wearable/health-app data to track fitness metrics such as heart rate and caloric burn.
- Engineered automated nutrition support offering personalised meal plans and hydration reminders based on recovery data.
